
Introduction

Hi, I'm Pierre Romera developer & data-journalist

I'm CTO at Journalism++ (<http://jplusplus.org>), an agency that I co-founded after having been responsible of the web applications at OWNI (<http://owni.fr>).

I'm also a Associate Professor at Sciences Po, where I teach computer science to journalists. I otherwise do many trainings for professional journalists, covering data-journalism, computer security and programming.

I've been busy, let the data talk

My time is split between coding, investigating and teaching. I'm better with numbers so let the figures below speak for themselves.

I authored **11245** commits (A
submission of my latest
changes of a source code) over
116 projects

I gave \pm **1056** hours of training
in **8** countries

11 prizes awarded for
7 projects I worked on

COMMITTS (A
SUBMISSION OF MY
LATEST CHANGES OF A

Here's what I've done

According to my Github Stats (<http://coderstats.net/github/pirhoo/>) I mostly code in Javascript and Python. Both are my favorite languages. Almost all my projects are Open Source and available on Github (<https://github.com/pirhoo?tab=activity>).
